### ROLLED STEEL

The export of Rolled Steel materials would be allowed during this half-yearly period ending September 1964. The following procedure is laid down for parties intending to enter into export commitments either for fabricated materials or for rolled steel materials.

List 'A' enclosed with this Notice contains names of items which are available freely for export either as rolled products or for fabrication of engineering goods proposed to be exported. List 'B' gives the particulars of materials which may be available in limited quantities for export either as rolled products or as fabricated engineering goods. Materials not included either in list 'A' or in list 'B' would not normally be available for export.

So far as items included in list 'A' are concerned, there would be no objection to any exporter of rolled steel or of engineering goods to enter into export commitment without making any prior reference to the Steel Control.

So far as items mentioned in list 'B' are concerned, a reference should be made to the Iron and Steel Controller, before entering into any commitment for export, as to whether any export commitment can be made. A decision as to whether such materials would be available for export would be given to the intending exporter within a week from the date of receiving the reference from such exporter.

So far as items not included in lists 'A' or 'B' are concerned, if there is any specific offer which may be considered beneficial to the country, a reference may be made to the Iron and Steel Controller for ascertaining whether the material in question would be available. In any circumstance, however, no prior commitment should be made in regard to any such items as also with regard to items mentioned in list 'B' mentioned above.

Intending exporters may receive offers for export of rolled steel of non-Indian specifications or of fabricated goods made out of rolled steel of non-Indian specifications. Normally, the question of manufacture of such steel of non-Indian specification would not be considered. However, if the order is of comparatively large magnitude and if the offer seems beneficial from price and other aspects, the question of specially rolling such steel may be considered.

The items mentioned in list 'A' may be freely exported and the categories mentioned in list 'B' can be exported only with the concurrence of Iron & Steel Controller.
